**Subject:** Site list

Hi Steve. Attached is the site list and it's close to being up-to-date. Note that it includes Montana and Fed Fac, as well as Units A and B, and has non-NPL sites on it. Essentially, if it is a site that an RPM is spending any significant time on, it was listed.

I think you'll also see that some RPMs have sites in different units. Using myself as an example, Arsenic Trioxide is in Unit A, but some of my other sites are in post construction, so were moved over to Unit B. Confusing. I think Stan wants to talk about a better way to organize the sites/staff. Something to consider for the future, perhaps.

The blue color is for NPL sites that are construction complete. The salmon color is for non-NPL sites that are post construction. (So, the non-NPL equivalent to construction complete.) The sites are listed alphabetically by state.

Lastly, please print by page if you decide you want to print it out or you might get many pages with one line on it.

I'll also send the most recent phone list for Units A and B. (Called site assignment)

Let me know if you have questions or find something I need to correct.
